

Precision Engineering Automated Manufacturing Lifetime Warranty

PREMIUM HARDWOOD UNDERLAYMENT

for Vinyl & Ceramic Tile Floors

POWERHOLD PLUS

TM

Everything Else is Plywood

It's been said that beauty is only skin deep. It is not true, at least insofar as our new POWERHOLD PLUS™ premium hardwood underlayment is concerned. For perfection in vinyl and ceramic tile installations, nothing else is quite so beautiful from the inside out.

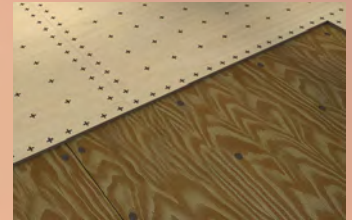

POWERHOLD PLUS™ is constructed using premium hardwood uniquely laminated with exterior grade glue. So what? This means that, unlike other underlayment products, POWERHOLD PLUS™ premium hardwood is virtually impervious to moisture. It resists swelling and will not delaminate even under the most demanding applications. And, it is warranted for life.

POWERHOLD PLUS™ premium hardwood is dimensionally accurate making installation nearly effortless. Corner-to-corner tolerances less than 1/32-inch. Variation in thickness is nearly zero. You get a level, TileTite™ fit every time with seams that are virtually seamless.

POWERHOLD PLUS™ premium hardwood underlayment is available in 6mm and 9mm thicknesses and is laboratory proven. Every square inch of every sheet undergoes ultrasonic "pinging" to ensure the absence of hidden voids. You won't find surprising bubbles or depressions in your vinyl installations resulting from hidden flaws inside your underlayment. We don't ship potential problems just because you can't see them. If there is an inconsistency, we catch it so you don't have to.

The practicality of all this quite simple: Your flooring installations deliver consistently superior performance and demand less installation time. Your customer enjoys a great vinyl or ceramic tile floor that starts beautiful and stays beautiful for years to come.
